Scoping Comment Summary

Western Washington Sustainable Harvest Calculation Scoping Summary

- Scoping Notice issued on October 25, 2021 opening a public comment period until December 9, 2021
- Public webinar held live on November 9, 2021; recording made available on November 16, 2021
- 20 commenters, (179 individual comments)

Western Washington Sustainable Harvest Calculation Scoping Summary

Comments received from:

Industry

- American Forest Resource Council
- Sierra Pacific Industries
- Washington Policy Center

Environmental Groups

- Center for Responsible Forestry
- Center for Sustainable Economy
- Olympic Forest Coalition
- Sierra Club
- Washington Environmental Council
- Washington Forest Law Center

Tribes

- Lummi Nation
- Squaxin Island Tribe

Local Government/Agencies

- City of Forks
- Port of Port Angeles
- Skagit County Commissioners
- Washington State Association of Counties

Individuals:

- Five individual commenters

Sustainable Harvest Calculation Scoping Notice

The scoping notice requested, and DNR received, comments on:

- Purpose, Need, and Objective
- Probable, significant environmental impacts
- Key Environmental Issues
- Alternatives for consideration
- Mitigation measures
- Additional information to consider
- Elements of the environment
- Environmental justice considerations

DETERMINATION OF SIGNIFICANCE AND REQUEST FOR COMMENTS ON SCOPE OF EIS

Description of proposal: The proposal is to establish a sustainable harvest level for the 2025 to 2034 fiscal year planning decade for forested state trust land in western Washington.

Proponent: Washington Department of Natural Resources (DNR)

Location of proposal: All forested state trust lands located west of the Cascade Crest in Washington State (refer to attached map).

Lead agency: DNR

Determination: *Environmental Impact Statement (EIS) required.* The lead agency has determined this proposal potentially will have a significant adverse impact on the environment. An EIS is required under Revised Code of Washington (RCW) 43.21C.030(2)(c) and will be prepared.

Deadline for comments: December 9, 2021 by 5:00 pm

Scoping notice invites comments:

Scoping is the first formal step in preparing an EIS and initiates public involvement. Through scoping, DNR seeks public input on identifying the areas that require in-depth analysis, and those areas for which a more limited discussion is appropriate. This process helps to focus DNR's consideration on the issues that are truly significant, and avoids obscuring those issues with unnecessary detail. The primary purposes of scoping are to:

- Narrow the focus of the EIS to significant environmental issues;
- Eliminate issues that would have insignificant impacts, or that are not directly related to the proposal;
- Identify alternatives to be analyzed in the EIS; and
- Identify mitigation measures that address potential environmental impacts of the proposal.

Western Washington Sustainable Harvest Calculation Scoping Summary

DNR also received comments in these areas:

EIS Content or Analysis

- Elements of the Environment
- SEPA
- Analysis
- Economic Analysis
- Timing and Litigation

Input/Data

- Forest Estate Model
- Inventory
- Silviculture
- Species Management

Western Washington Sustainable Harvest Calculation Scoping Summary

DNR also received comments in these areas:

Management/Policy

- Trust Mandate
- Ecosystem Services
- Climate
- Policy for Sustainable Forests
- Forest Health
- Other Funding

Other:

- Trust Land Transfer
- Cultural Resources
- References
