

## Review Matrix of the 10-Year Wildland Fire Protection Strategic Plan

Goal	Sub-goal	Implementation Status	Metrics	Does Goal Need to Change
1. Washington’s preparedness, response, and recovery systems are fully capable, integrated, and sustainable	Preparedness	Are we more prepared now than 2015? <ul style="list-style-type: none"> <li>• Capable –</li> <li>• Integrated –</li> <li>• Sustainable –</li> </ul>		
	Response	Are we better at responding now than 2015? <ul style="list-style-type: none"> <li>• Capable –</li> <li>• Integrated –</li> <li>• Sustainable –</li> </ul>		
	Recovery Systems	Do we have better recovery systems now than 2015? <ul style="list-style-type: none"> <li>• Capable –</li> <li>• Integrated –</li> <li>• Sustainable –</li> </ul>		

Goal	Sub-goal	Implementation Status	Metrics	Does Goal Need to Change
2. Landscapes are resilient. In the face of wildland fire, they resist damage and recover quickly.		Are landscapes more resilient to wildland fire than 2015? <ul style="list-style-type: none"> <li>• Resist damage –</li> <li>• Recover quickly –</li> </ul>		
Goal	Sub-goal	Implementation Status	Metrics	Does Goal Need to Change
3. Communities are prepared and adapted for current and future wildland fire regimes.	Prepared communities	Are communities better prepared for wildland fire than 2015? <ul style="list-style-type: none"> <li>• Current fire regimes –</li> <li>• Future fire regimes –</li> </ul>		
	Adapted communities	Are communities better adapted for wildland fire than 2015? <ul style="list-style-type: none"> <li>• Current fire regimes –</li> <li>• Future fire regimes –</li> </ul>		
Goal	Sub-goal	Implementation Status	Metrics	Does Goal Need to Change
4. Response is safe and effective.	Response is safe	Is response safer than 2015?		
	Response is effective	Is response more effective than 2015?		

# Outcomes

Outcome	Sub-outcome	Implementation Status	Metrics	Does Outcome Need to Change
1. Safety of the public and firefighters is provided for, wildland fire is suppressed when necessary and used where allowable	Safety of the public and firefighters	Is safety better provided for than 2015? <ul style="list-style-type: none"> <li>• Public –</li> <li>• Firefighters –</li> </ul>		
	Wildland fire is suppressed and used	Is wildland fire better suppressed and utilized than 2015? <ul style="list-style-type: none"> <li>• Suppression –</li> <li>• Utilization –</li> </ul>		
Outcome	Sub-outcome	Implementation Status	Metrics	Does Outcome Need to Change
2. Unwanted human-related wildland fires are virtually eliminated		Have unwanted human-related wildland fires been virtually eliminated since 2015?		
Outcome	Sub-Outcome	Implementation Status	Metrics	Does Outcome Need to Change
3. Costs to suppress wildland fire are reduced, risks and losses to communities and the economy are minimized	Suppression costs reduced	Have suppression costs been reduced since 2015?		
	Risks and losses minimized	Have risks and losses been minimized since 2015? <ul style="list-style-type: none"> <li>• Communities –</li> <li>• Economy –</li> </ul>		

Outcome	Sub-Outcome	Implementation Status	Metrics	Does Outcome Need to Change
4. Communities and ecosystems are resilient and healthy, both can recover from wildland fire.	Communities resilient and healthy	Are communities more resilient and healthier and better able to recover than 2015? <ul style="list-style-type: none"> <li>• Resilient –</li> <li>• Healthy –</li> <li>• Recovery –</li> </ul>		
	Ecosystems resilient and healthy	Are ecosystems more resilient and healthier and better able to recover than 2015? <ul style="list-style-type: none"> <li>• Resilient –</li> <li>• Healthy –</li> <li>• Recovery –</li> </ul>
